

# DINESH RAMAR

Frontend React.js Developer | 4+ Years Experience

Chennai, India | +91 78268 02550 | dineshramar413@gmail.com | linkedin.com/in/dinesh-ramar | github.com/dinesh-ramar

## PROFESSIONAL SUMMARY

Frontend React.js Developer with **4+ years of experience** building secure, scalable, and accessible web applications for global banking and financial services clients. Experienced in **React.js, TypeScript, Redux Toolkit, React Query, REST APIs, and performance optimization**, delivering production-ready applications with **25% smaller JavaScript bundles** and **90+ Lighthouse Accessibility scores**. Strong expertise in **WCAG 2.1 AA, VAPT remediation**, reusable component development, and Agile delivery. **Immediate Joiner.**

## TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Bootstrap, Tailwind CSS, Responsive Design

State Management: Redux Toolkit, Redux, Context API

React Ecosystem: React Hooks, React Router, React.memo, React Query, Custom Hooks, Vite, Webpack

APIs & Tools: REST APIs, Fetch API, Axios, Git, GitHub, npm

Quality & Compliance: WCAG 2.1 AA Accessibility, Lighthouse, Web Performance, Cross-Browser Compatibility, VAPT Remediation

Development Practices: CI/CD Pipelines, Agile Scrum, Code Reviews, Drupal CMS

Testing: Jest (Basic), React Testing Library (Basic)

## PROFESSIONAL EXPERIENCE

Frontend React.js Developer | Xerago, Chennai

Dec 2021 – Jan 2026

Client: Ujjivan Small Finance Bank (India)

- Delivered 10+ production-ready React.js UI modules across multiple enterprise banking applications, improving maintainability through reusable component architecture and responsive design.
- Reduced initial JavaScript **bundle size by 25%** using code splitting and lazy loading, directly raising Lighthouse Performance scores across all production applications.
- Achieved Lighthouse **Accessibility scores above 90** on all production apps by enforcing WCAG 2.1 AA standards — semantic HTML, ARIA attributes, and full keyboard navigation.
- Streamlined React.js component architecture with React.memo, useMemo, and useCallback, cutting unnecessary re-renders and improving runtime performance across all production applications.
- Executed VAPT security reviews before every production release; identified and **resolved 100% of flagged vulnerabilities** to meet strict financial services compliance requirements.
- Integrated **5+ secure REST APIs** using token-based authentication to enable reliable data exchange, dynamic content rendering, and validated customer workflows.
- Built the company website and technical blog using React.js, Redux Toolkit, and Tailwind CSS; applied SEO metadata strategies that improved organic search rankings.
- Improved frontend code quality by enforcing coding standards, Git branching, and CI/CD practices, reducing production issues by 30% and enabling on-time releases.

## PROJECTS

### Xerago Website Development

**Tech:** React.js · Redux Toolkit · JavaScript · Tailwind CSS

Engineered 20+ reusable UI components and modular content pages, integrated REST APIs, accelerated performance through code splitting and lazy loading, and ensured responsive design with cross-browser compatibility.

### Employee Workforce Analytics Dashboard

**Tech:** React.js · TypeScript · React Query · Context API · REST APIs

Architected a real-time workforce analytics dashboard using React.js, TypeScript, React Query, and REST APIs to monitor 100+ employees. Built reusable components, implemented background data synchronization, and optimized rendering using React.memo and useMemo, improving scalability and user experience.

### Ujjivan Small Finance Bank

**Tech:** React.js · Drupal CMS · JavaScript · HTML5 · CSS3 · Bootstrap

Contributed to the development of a large-scale banking portal using React.js, Drupal CMS, HTML5, CSS3, and JavaScript. Crafted responsive customer workflows, reusable UI components, and interactive interfaces with robust validation and error handling. Integrated secure REST APIs using access token authentication, boosted frontend performance, implemented WCAG 2.1 AA accessibility standards, completed VAPT remediation, and collaborated with cross-functional teams to deliver scalable, production-ready banking applications.
